Scenario Identification:

Positive Scenarios

1. Positive Scenario 1: Successful Registration
- **Steps:**
  1. Navigate to the registration form page.
  2. Enter valid information in all required fields: Full Name, Email Address, Password (meeting requirements), Confirm Password, Date of Birth, select Gender, and opt-in for Newsletter Subscription.
  3. Click the Submit button.
- **Expected Outcome:**
  - A success message should appear confirming successful registration.
  - The user should be redirected to a new page or shown a confirmation message.
  - The entered data should be saved in the backend database for future use.

2. Positive Scenario 2: Newsletter Subscription Opt-out
- **Steps:**
  1. Navigate to the registration form page.
  2. Enter valid information in all required fields: Full Name, Email Address, Password (meeting requirements), Confirm Password, Date of Birth, select Gender, but do not opt-in for Newsletter Subscription.
  3. Click the Submit button.
- **Expected Outcome:**
  - Registration should proceed successfully without subscribing the user to the newsletter.
  - User should receive a success message indicating registration completion.
  - Data should be stored in the backend without opting the user into the newsletter.

Negative Scenarios

1. Negative Scenario 1: Invalid Email Address
- **Steps:**
  1. Navigate to the registration form page.
  2. Enter valid information in all required fields except Email Address.
  3. Enter an invalid email format (e.g., missing '@' symbol).
  4. Click the Submit button.
- **Expected Outcome:**
  - A validation message should appear next to the Email Address field indicating the need for a valid email format.
  - The Submit button should remain disabled until a valid email address is entered.
  - No data should be submitted to the server until all fields are correctly filled.

2. Negative Scenario 2: Password Mismatch

- **Steps:**
  1. Navigate to the registration form page.
  2. Enter valid information in all required fields including Password and Confirm Password, but the Confirm Password field does not match the Password field.
  3. Click the Submit button.
- **Expected Outcome:**
  - A validation message should appear next to the Confirm Password field indicating that passwords do not match.
  - The Submit button should remain disabled until passwords are correctly matched.
  - No data should be submitted to the server until passwords are correctly matched.
